

## **PRINCIPLES ON CONFLICT MINERALS**

ELECTRONICA CERLER, S.A., as an Electronic Manufacturing Services (EMS) provider, may be affected by the supply of minerals or metals originating from risk and/or conflict areas. Therefore, it commits to ensuring that the materials contributed to the products we supply to our customers do not contribute to the financing of conflicts and armed groups.

To ensure compliance with this premise, the following principles are applied in the acquisition of the main materials not specified by our customers and that may come from a conflict zone:

- Identify if any of the materials may contain minerals from conflict zones.
- Request suppliers of these materials to provide a statement, in accordance with the CMRT, detailing the origin of the minerals. In case the supplier relies on responsible declarations, ELECTRONICA CERLER, S.A. may audit the supplier's procurement processes.
- In case any of the materials use minerals from conflict zones, require the use of another supply source or suspend procurement from this supplier.
- Make the declarations required by our customers according to the CMRT standard.
